Compounding World Expo 2018, Essen

Compounding World Expo will premiere on 27th and 28th June 2018 at Messe Essen. The international exhibition for plastic additives and compounding is presented by AMI (Bristol UK, www.ami.international), the leading global organizer of conferences for the plastic additive, compounding and masterbatch market and Compounding World Magazine.

Über die Polycompound

Polycompound AG in Sissach Switzerland, produces customized special-purpose and standard compounds for an international clientele. The company has no product portfolio of its own, but exclusively processes compounds for customers according to their strictly secret formulations – from small-scale productions of a few kilograms to hundreds of tones. With seven Continuous Kneaders, an annual production capacity of 8'000-12'000 tones p.a., the company founded in 1988 has a work force of approximately 60 employees.
